## Capture Pro Software Network Edition

GO PRO

## Makeover and streamline capture across your entire enterprise

Your capture operation is diverse and distributed, with scanners, indexing and processing stations deployed throughout your multi-location enterprise or large service bureau. **Kodak Capture Pro Software Network Edition** centralizes all the power you need to scan, process, utilize and manage documents and important

data from those documents. Centrally deploy and manage capture and indexing stations to feed a repository or business process – utilizing **Kodak Scanners** and those of other popular manufacturers – with the advanced advantages of streamlined server and client software.

Capture Pro Network Edition provides –

- Central administration
- Central licensing
- Batch monitoring
- Optional remote output

Drive down costs, simplify licensing, and identify/resolve bottlenecks

# Kodak Capture Pro Software Network Edition

Take command, gain insight, and resolve issues faster with centralized administration and deployment

- > **Achieve better data integrity with shared workstation setups** – for remote management of multiple capture and indexing stations
- > **Drive down costs and be ready for the future** – through faster deployment and scaling for volume needs
- > **Make budgeting easier** – thanks to centralized, more flexible licensing
- > **Improve speed of business processes and maintain productivity** – via enhanced insight into bottlenecks and batch status
- > **Gain greater awareness of true throughput and performance** – to make quick adjustments and achieve goals
- > **Optimize downstream business processes** – through resolution of slowdowns at workstations

Centrally administer Capture Pro Software across your network and enterprise.

## The total package for your dynamic capture environment

- > **Kodak Capture Pro Server Software** – featuring remote administration, batch monitoring and centralized licensing
- > **Kodak Capture Pro Client Software** – for scanning and importing documents, automatic and manual indexing, quality control, and output to other systems
- > **Kodak Capture Pro Software Output Server Module** – for centralized processing of documents at any work station while output is handled at another location

Simultaneously process batches at your server while you scan and perform Intelligent QC at another work station. Just one example of multitasking efficiency.
